**LA TEVA  
DECISIÓ**

ELECCIONS MUNICIPALS

## ENVIRONMENT

From Més per Palma we'll keep promoting a sustainable Palma that makes nature and green spaces the top priority. We want to walk towards the energy sovereignty of Palma, we want to breath clean air, walk clean cities and have quality and sufficient water.

We want a city without disturbing noises and end with uncontrolled dumping.

**MÉS  
PER PALMA**

**Estimam  
Palma.**

1. We'll keep promoting seaside ecosystems, protecting them as we have done with Es Carnatge.
2. We'll double the trees in Palma
3. We'll restore and dignify the water courses of the city as natural spaces that work as ecological linkages.
4. We'll complete the implementation of bio-waste separate collection to the whole city and its villages.
5. We'll make of Palma a '30 km/h city' so that we have livelier cities, we reduce noise and CO2 emissions, and we contribute to mitigate climate change and to decongest the city.
6. We'll stimulate deposit-return schemes for packaging, by incentivising companies and consumers.
7. We'll plant urban and suburban forests with local species from the Mediterranean area.
8. We'll take the steps needed to get to zero dumping to the Bay of Palma.
9. We'll combat the plastic marine litter and other emerging pollutants by supporting ourselves in the new Law on Waste of the Balearic Government.
10. We'll work to make sure that Palma becomes the owner of the electrical grid.
